# WE BUILD THE USA!

## WHAT IS THE “WE BUILD THE USA” CHALLENGE AND HOW WAS IT STARTED?

TP Mechanical recently participated in the We Build the USA Challenge after learning about it. We were challenged by the McAndrew’s Window & Glass, and our fabrication shop completed this task, constructing a We Build the USA sign.

This challenge was started by the Associated Builders and Contractors, Inc. (ABC). The We Build the USA mission is:

- To promote careers in the construction industry
- To recognize the outstanding work of America’s skilled trades people
- To reward future workers looking to Build the USA with scholarships

## VISION

We Build the USA shall increase the number of individuals pursuing careers in construction through recognition and promotion of opportunities in the industry. We shall reward those interested in starting or advancing their career in construction through scholarships. We shall fund scholarships by challenging members of our industry to speak out about construction careers. We shall improve the perception of our industry with statistics on safety and training, while shining a bright light on the accomplishments of construction trades people all across the United States of America.

## THE CHALLENGE

Here’s how the ABC is challenging companies, asking them to:

Either donate to the cause, and/or use their creative skills to support our cause publicly (ex: create a sign out of building materials, a video from your employees, a CAD design, etc.) and link it to ABC on social media. Then Challenge three others within the industry to do the same.
