

SAFETY FIRST, ALWAYS FIRST

*Safety's not just a standard we uphold.
It's a way of life.*

We value the health and well-being of everyone on our job site above all else. That's why we go above and beyond OSHA requirements to secure our worksites and ensure that our workers are protected. Achieving a safe environment takes teamwork, employee involvement and upper management commitment.

Our first core value is "Safety First, Always First," and we will relentlessly pursue the highest standard so that we can send each of our employees home to their families every night, injury-free. Our safety program consistently emphasizes prevention and avoidance of safety and health hazards.

VOLUNTARY PROTECTION PROGRAM (VPP)

As participants in OSHA's Voluntary Protection Program (VPP), we've implemented meticulous safety and health management practices that address hazard prevention and control, worksite analysis, training, management commitment and worker involvement.

VPP promotes effective jobsite-based safety and health. In this program, management, labor and OSHA establish cooperative relationships at workplaces that have implemented a comprehensive safety and health management system.

As a mobile workforce participant in VPP, TP Mechanical voluntarily submits to rigorous evaluations to identify ways that we can continue to improve our system. Approval into VPP is OSHA's official recognition of the outstanding efforts of employers and employees who have achieved exemplary occupational safety and health.

In September of 2005, TP Mechanical, became the first mechanical contractor in the U.S. to achieve this exemplary designation.
