

# THE EXCHANGE

## SPRING 2017

### THE TP MECHANICAL DIFFERENCE

We understand that you have many mechanical contractors to choose from, but we believe that TP Mechanical is best positioned to meet your construction needs.

Our commitment to excellence starts with our people, our service and our quality.

These three pillars of success are supported by our core values that we embrace and live out every day:

- Make Safety First, Always First
- Serve by relentlessly offering our experience and expertise through unconditional teamwork
- Mentor and grow everyone within our company through servant leadership
- Engage every opportunity and challenge with a winning attitude

With TP Mechanical, you have an end-to-end provider of comprehensive mechanical services – you can trust us to be the single point person for multiple aspects of your construction project in the health care, hospitality, education industries and the public sector.

We aim to develop long-term partnerships, delivering innovative solutions as the premier contractor for:

- Mechanical systems
- HVAC
- Refrigeration
- Plumbing
- Fire protection systems
- Prefabrication
- Design, engineering and pre-construction

**“We are committed to the highest standard of excellence for all of our capabilities. Overcoming challenges and solving problems is our specialty,” says TP Mechanical President and CEO Bill Riddle. “Our goal is to assist you in completing your project in a safe manner, on time and on budget.”**

We have five locations in three states so we can personally work with your team to deliver the best results for every project. Contact one of our offices to start – or continue to build – a strong partnership.

## TP MECHANICAL CONFORMS TO ISO 9001:2015 STANDARDS AGAIN

TP Mechanical is proud to announce that our company recently received recertification as conforming to ISO 9001:2015 standards.

Our Quality Management System was certified as conforming to ISO 9001:2015 standards, and the scope of the registration is for the “prefabrication of components for the purpose of fast-track construction in the piping and mechanical plumbing fields.”

TP Mechanical uses prefabrication to reduce construction costs and shorten schedules while decreasing waste and scrap. By doing more work in the controlled environment of our shop, we enhance safety and achieve higher quality for the projects completed on the job site.

“This recertification demonstrates our commitment to the continuous improvement of our products and services,” says TP Mechanical Chief Operating Officer Tim Hoover. “This standard highlights how our entire team focuses on quality and discipline in our prefabrication efforts.”

By conforming to ISO standards, we help our clients by:

- Improving quality and service
- Reducing the amount of on-site work
- Providing on-time delivery
- Fostering a get-it-right-the-first-time attitude
- Reducing mistakes, change orders and defects

## IN THE COMMUNITY

### Heart Mini

TP Mechanical sponsored the Heart Mini, and our team achieved our goal of raising more than \$5,000 for the American Heart Association’s Cincinnati chapter.

Thank you to all our employees and families for helping raise funds to combat heart disease, the leading cause of death for men and women in our country. Go team!

### March Blood Drive

Approximately 38 percent of our country’s population is eligible to give blood, according to the American Red Cross. But less than 10 percent of those who are eligible do donate annually. Because someone in the U.S. needs blood every two seconds, we believe it’s imperative to help collect blood for our area hospitals. Our Cincinnati and Columbus offices will be hosting an employee, family, customer and vendor blood drive March 31 to support the Hoxworth Blood Center and American Red Cross.

### Fall Gala

We’re hosting our annual Gala on Oct. 21, 2017, at the Cincinnati Marriott at RiverCenter. This year’s Monte Carlo night will benefit A Kid Again, an Ohio-based 501(c)(3) organization that supports area families who have children with life-threatening illnesses.

If you would like more information or if you would like to sponsor or attend the October event, please contact Tara Teepe at 513.898.8909 or [tara.teepe@tpmechanical.com](mailto:tara.teepe@tpmechanical.com).

## SAFETY FIRST, ALWAYS FIRST

While Safety First, Always First is our core value all the time, we especially celebrate March as Workplace Eye Wellness Month.

According to the American Academy of Ophthalmology, 25,000 Americans go to the emergency room every year due to workplace eye injuries. At TP Mechanical, we follow guidelines of the Occupational Safety and Health Administration (OSHA) to protect our employees from a wide variety of hazards, including dust, dirt, metal pieces, chemical splashes, swinging objects and radiant energy.

To keep our employees safe during their daily tasks, we provide and ensure they use personal protective equipment such as:

- **Safety spectacles:** Protective eyeglasses with safety frames constructed of metal or plastic and impact-resistant lenses.
- **Goggles:** Tight-fitting eye protection that completely covers the eyes, eye sockets and facial area immediately surrounding the eyes, and provides protection from impact, dust and splashes.
- **Welding shields:** Constructed of vulcanized fiber or fiberglass and fitted with a filtered lens, welding shields protect eyes from burns caused by infrared or intense radiant light. These shields also protect the eyes and face from flying sparks, metal spatter and slag chips produced during welding, brazing, soldering and cutting operations.
- **Face shields:** Transparent sheets of plastic extending from the eyebrows to below the chin and across the entire width of the employee's head. Some are polarized for glare protection. Face shields protect against nuisance dusts and potential splashes or sprays of hazardous liquids.

**To learn more about TP Mechanical's culture of safety, please visit our website.**

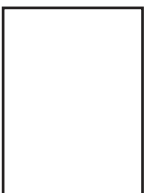

## WE'RE LOOKING FOR MORE GREAT TEAM MEMBERS!

Our commitment to excellence starts with great team members. We deliver results for our clients because we have qualified, dedicated staff who continually evolve as experts and leaders.

We are looking for a variety of professionals – from plumbers and pipefitters to project managers and service technicians – in Cincinnati, Columbus, Dayton and Lexington.

**If you know potential candidates,  
please forward our Careers link  
[www.tpmechanical.com/careers](http://www.tpmechanical.com/careers)  
for them to learn more and apply online.**

TP Mechanical is an equal opportunity employer, and we also offer a wide range of training and continuing education opportunities.
