SPECIAL PROJECTS

Our team of highly skilled engineers, project managers, and industry specialists provides comprehensive turnkey solutions for a wide range of specialized construction and facility improvement projects. From initial concept development and engineering analysis through final installation and commissioning, we deliver customized solutions designed to meet the unique needs of each client while minimizing operational disruptions and maximizing long-term performance.

Our capabilities include:

- Construction Engineering, Design, Analysis, and Evaluation
- Building Information Modeling (BIM)
- Air Handling and Auxiliary Air System Modifications or Replacements
- HVAC System Design and Installation
- Sheet Metal and Ductwork Fabrication and Modifications
- Indoor Air Quality and Pathogen Control Solutions

Whether your project involves a facility expansion, system modernization, tenant improvement, or mission-critical infrastructure upgrade, our experienced team provides the expertise, resources, and hands-on support necessary to deliver safe, efficient, and cost-effective results from start to finish. Our first core value is "Safety First, Always First," and we will relentlessly pursue the highest standard of safety so that we can send each of our employees home to their families every night, injury-free.
